- Member of the board of the International Conference on Environmental Ergonomics

Ambitions/intended input/output from participating in the project:

- Ambition is to contribute to the reduction of heat strain in European workers and improve the insight of workers and managers in thermal strain and alleviation methods during work
- Ambition is to expand and improve our Dutch model regarding the (economic) impact of global warming to the European level
- Input concerns thermal expertise in particular on elderly and work in the heat in protective clothing
- I look forward to work in the nice team that is brought together for this project
